

how HOSPICE HELPS

Patients enrolled in hospice care live, on average, **29** days longer than patients not in hospice care.

Most patients report pain was brought to a comfortable level within **48** hours of initial assessment.

Patients enrolled in hospice care report a **higher** quality of life.

Skilled Nursing

Personal Care

Family Support

Education

Medication & Equipment

Symptom Management

Emotional & Spiritual Support

Therapies

Grief Counseling

Hospice is not a place, but a service that comes to the patient. >>>

At Cedar Valley Hospice, **96%** of our patients receive hospice services in their own homes or a residential facility.

Hospice is **not only** for your final hours or days.

The sooner you call, the more we can help!
